

CaGreen GP 250

CaGreen GP 250 is a universal product for covering individual greenhouses and cultivation beds. The lattice-strengthened material is UV-stabilized, lets the light through and is characterized by its particular robustness. It offers reliable protection against wind and rain. The integrated strengthening strip ensures simple and secure fastening and processing. In addition, the material is 100 % recyclable. Subject to technical modifications.

FIELDS OF APPLICATION

- For lining greenhouses
- For lining cultivation beds

BENEFITS

- Promotes the growth of plants
- Protects against wind and rain
- UV-stabilized
- Highly transparent
- Simple, can be used in individual applications
- Does not rot
- Simple disposal: 100 % recyclable

TECHNICAL DATA

Weight (g/m ²)	250
Tear resistance (longitudinally) (N/5cm)	500
Tear resistance (crossways) (N/5cm)	350
Elongation (longitudinally) (%)	20
Elongation (crossways) (%)	20
Nail tear resistance (longitudinally) (N)	240
Nail tear resistance (crossways) (N)	150
Temperature resistance (°C)	- 40 to + 80
Roll width/Roll length (m)	1.50/50 2.00/50
